

# Let's make color changing slime!

The color gradually changes while kneading.

The color of slime changes from violet to pink by reacting with body temperature.

## Color changing ink for slime

### Indicator Ink

20 g for each packing

This ink allows you to visually detect temperature changes as color changes.

When warmed, the color changes. When cool, the color returns to the original state.

Enjoy the color change by mixing it with slime or clay.

- Usage guideline : about 10 drops (0.5 ml) per 100 ml of slime liquid.

#### 25°C Pink

At low temp.    At high temp.

Violet

Pink

#### 20°C Lime

At low temp.    At high temp.

Blue

Lime
